

## DocResponse Mic and Camera Check MacOS

Is your Microphone and Camera not working?

This is most likely an issue with your browser permission to use the microphone and camera.

**Let's check to ensure you've granted your browser to access the microphone and camera. These changes can be made in your System Preferences.**

Using MacOS

1. Find and open the Systems Preferences -> Click Security Privacy
2. Click Camera or Microphone
3. Click the checkbox next to the application you wish to allow access to your camera and microphone.
4. Check to make sure the MacOS is on the latest system software updates.
